(54) Title: **MESSAGE MEMORY FOR A COMMUNICATION PROTOCOL AND METHOD**

(57) Abstract: A message memory (1) with a flexible association between the message-object memories of the message memory (2) and the segments of a physical memory (3). The association is made through configuration, wherein one or more memory segments form a cluster as a function of the length of the message content to be stored.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
